- Software Skills : Java, Python, CSS, HTML, Processing, Prusa Software
- Intellectual skills: Computer and Tech skills – easy to adapt and learn, Analytical skills, Communication – formal or informal, Troubleshooting, Organization and Management – Leadership

EXPERIENCE

Summer 2020

- **Software Engineer • Robotics Internship • ABB**
 - In this internship over the summer of 2020 I was handpicked out of 20 people to a group of 7 where we took the robotics training at ABB for clients and then given a task. My task was to create a new concept website and demo for a new organization system for their warehouses.

Spring 2020

- **Programming • Student • ISP**
 - Voluntarily I programmed from scratch a forum website for my school aiming to connect the ISP community members together during the quarantine during the beginning of the pandemic. Although it was fully functioning, for legal reasons it was not allowed to be used and published for the school.

January 2021-Present

- **3D Printing and Design • Science Internship • J. Heyrovsky Institute of Physical Chemistry**
 - This internship is still on going. My aim at this internship is to design and create 3d models for scientific experiments. Furthermore, another purpose of this internship is to try to replace expensive scientific tools by making them with 3d technology which is what I'm doing as I aim to make a microscope with 3d technology for less financially fortunate institutions or people. I use Prusa software for this.

EDUCATION

International School of Prague, Prague, Czech republic, 2011- Present

- I am still studying in the International School of Prague in the 10th grade (just finished) with very good grades. The curriculum in the High School of the International School of Prague is based on the International Baccalaureate program. My courses are mainly centred around higher level engineering and business.

Zakladni Skola Jary Cimrmana, Lysolaje (Czech school), 2011-2020 Graduated

- This school is a Czech school that I attended the Czech program of for citizenship purposes. I did it for 9 years and graduated with very good grades as well.

OBJECTIVE

As a teenager, I hope to find opportunities in technology related companies to gain real world experience to enhance my social and intellectual skills as well give an insight on the real world industry. With positions like these, I hope to use the experience and skills learned for the future in similar positions. I hope to improve my communication, management and work ethic skills.

LEADERSHIP

- International School of Prague Student Council Grade Representative for 9 and 10th grade
- International School of Prague Student Council Vice President
